Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 19, 2006 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 17-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. For claims 17 and 24, it is unclear whether or not the tent is to be claimed in combination with the eve. The preambles of the claims are directed to the eve only ("An eve for..." and "A tent eve for..."); however, the body of the claims positively claim tent limitations in combination with the eve (e.g. "(eve) frame positioned with respect to the fabric enclosure (of the tent)").

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7, 12, 14-17, 19, and 21-25 are rejected under 35 U.S.C. 102(b) as being anticipated by McMillin (998,915). McMillin teaches a tent (Fig. 1) comprising: a fabric enclosure (5) forming walls and an interior; a frame (2,12,9,10) positioned with respect to the enclosure and configured to support the enclosure; a first plurality of straight eve portions (3,13) coupled to the frame and extending outwardly from a first wall of the walls, a second plurality of eve portions (3,13; other side) coupled to the frame and extending outwardly from a second wall of the walls, and a cover (B) coupled to the frame and eve portions and configured to cover the enclosure. The enclosure also has a first roof panel (4) and a second roof panel (4; other side) and the frame also includes first frame members (3; middle) and second frame members (2; middle of each side) coupled to a respect first member via a coupling device (14,12). The tent eves and cover would inherently be configured to reduce rainfall contact with the first wall and would inherently provide shading to portions of the tent from light and prevent ultra-violet degradation thereof.

Allowable Subject Matter

Claims 8-11 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 18, 20 and 26 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
